DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to a semiconductor device, classified in class 257, subclass 1+.
- II. Claims 23-29, drawn to a method of designing a device, classified in class 716, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device could be made by a materially different design method such as one in which the grid of gate shapes has a usable fixed width is the same or greater than said fixed width rather than the usable fixed width being less than said fixed width.

The Examiner notes that the claims of Group I include both method of making a semiconductor device and semiconductor device claims. The method claims, as presented, are not patentably distinguishable from the device claims. However, if the method claims are later amended to include limitations not necessary to form the device, as claimed, the claims may be subject to further restriction.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
